## **Environmental Policy Statement**

### **Environmental Policy Objective**

Dynek is committed to provide employees and customers with a safe and healthy environment. Environmental protection is the responsible thing to do and makes for sound business practice.

### **Guiding Principles:**

- ❖ We will meet all applicable environmental laws and regulations in a cost-effective manner.
- ❖ We will incorporate environmental consideration into our business planning processes.
- ❖ We will foster the sustainable use of natural resources by promoting pollution prevention, reducing waste, recycling and reusing materials providing the processes do not affect our product, the users or our patients.
- ❖ We will expect every employee to take ownership and responsibility for our environmental objectives.
- ❖ We will work with customers to address mutual environmental concerns.
- ❖ We will encourage suppliers, vendors and agents to comply with similar environmental protection policies
- ❖ We will strive to reduce our carbon footprint through continuous process optimisation, implementing enhancements that deliver improvements that do not compromise product quality or safety of patients and users.

These guiding principles are implemented to the extent possible through Dynek's Standard Operating Procedures and Product Realisation.

Dr. Patricia A Crook, AO

**President**
