CONVERGE

COLLABORATIVE
FRONTIERS IN
DENTISTRY

INTRO DUCTION

CONVERGE will be a collaborative educational initiative bringing together three specialist dental societies across Brisbane—Endodontics, Periodontics, and Osseointegration. The event is designed to foster dialogue, knowledge-sharing, and clinical insight across disciplines. Our goal is not only to strengthen connections between specialist communities but also to extend our reach to the wider dental profession. By engaging general dentists and recent graduates, we aim to spark meaningful conversations around collaborative, patient-centred care and highlight the value of interdisciplinary treatment in modern dental practice.

OVERVIEW

Held in the Cloudland Rose Room, CONVERGE will present six expert-led lectures throughout the day, tailored for specialists, hygienists, and general dentists. Attendees will enjoy catered meals, with scheduled breaks providing time for trade show displays and networking. The day will conclude with drinks in the Palais, offering a relaxed setting to unwind after a full day of learning.

THE VENUE

Put your head in the clouds and dream big. “
Imagine a land beyond expectations. One where
anything is possible. Write your own story or
invite us to write it for you. Make memories. Make
friends. Enjoy a red-carpet welcome, the perfect
host, spaces that fascinate and attention at every
turn. We'll write the ending you hope for...
planned to perfection. Expect the unexpected.
Expect a whole lot more. It's yours.

“

It's Cloudland.
